## Parking systems

Even with a car as manoeuvrable as the Prius+, you'll find the Toyota parking aid system a big help in avoiding accidental scrapes.

The system has ultrasonic sensors linked to in-cabin alarms that grow louder the closer you get to obstacles. Depending which model you drive, you can have sensors in the front, rear or front and rear bumpers. Importantly, the front and rear alarms have different tones and can be switched off when not required.

### Parking aid sensors

The ultrasonic sensors are colour coded to your car's bumpers.

### Cancellation switches

You can switch off the parking aid sensor alarms when not required.

## Extra security

It's comforting to have a car as safe as the Prius+. Toyota's vehicle security system increases that peace of mind by providing additional protection when your car is parked.

The system has a powerful alarm to complement the Prius+'s pre-fitted immobiliser. An optional incline sensor is also available to warn of attempted wheel theft and towing.

## Tailored space

Versatility, peace and quiet. The Prius+ gives you extraordinary layout flexibility combined with pure ride comfort for you and your passengers. Toyota interior accessories build on the appeal.

The range includes especially designed restraint seats for youngsters up to around 12 years.

There's leather upholstery and styling details for luxury, and floor mats and trunk storage for added practicality. The concept is tailored space. Each accessory gives you options to reflect life and your way of living it.
